

**“ALL – ON – 4”®
AN IMPLANT SOLUTION
FOR THE EDENTULOUS PATIENT OR
THOSE ABOUT TO LOOSE THEIR TEETH**

**WOULD YOU LIKE TO CHANGE YOUR LIFE DRAMATICALLY
IN A DAY?**

A predictable way to be rid of all the problems that haunt you with complete upper or lower dentures is now available:

- **Have you given up on finding a solution for your denture retention? Has it caused you emotional duress, lowered self-confidence and stopped you from smiling?**
 - This often leads to altered behavior in socializing and forming close relationships.
 - Due to significant bone loss, dentures are more unstable, even when speaking.
 - It often leads to premature aging.

“All-on-4”® provides a rapid solution, providing stability, retention, and the emotional security of having fixed, non-removable teeth.

- **Are you struggling with gagging problems?**
 - Many patients suffer with difficulty in managing with complete upper dentures due to their uncontrollable gag reflex.

With only 4 to 6 implants’ in most cases “All-on-4”® provides a rapid solution, completely eliminating the palatal coverage, providing you with fixed, non-removable teeth.

- **Are you limited with what you can eat?**
 - “Many edentulous patients avoid many types of foods, particularly raw vegetables and other hard and tough foods because they cannot chew these with conventional dentures.”
 - “As a result, such individuals consume significantly less protein and other key nutrients – including fiber, calcium, and other minerals and vitamins, than do individuals with teeth.”
 - The longer patients are without teeth, more bone is lost, leading to less and less bone to support a denture. This can lead to changes in facial appearance and potential exposure of the mandibular nerve.
 - Malnutrition is a major problem with the edentulous patient.

With “All-on-4”® , an implant supported fixed bridge provides 90% functional chewing capacity of natural teeth, compared to only 10% with a conventional complete lower denture.

- **Are you ready to significantly enhance the quality of you life with “All-on-4”® , a less invasive, same-day, fixed implant approach?**
Then look forward to:
 - Most like natural teeth feeling
 - No dietary limitations
 - Eliminate gagging problems
 - Food tastes normal
 - No more denture adhesive
 - For those with teeth that require extraction, the opportunity to provide an instant, stable, fixed, natural feeling solution is amazing.
 - Restore esthetics along with self-confidence in both social and business situations.
