TRUST YOUR SMILE TO A SPECIALIST

**Dr. Marshall Fagin**  
Prosthodontist

**Q • Am I a candidate  
• for dental  
implants?**

**A:** Are you missing teeth? Are you lacking confidence because of your teeth or smile?

Do you want natural looking replacement teeth? Do you want to preserve your natural teeth and avoid crowning them with a fixed bridge? Does wearing a denture restrict your ability to eat and smile comfortably? Dental implants can replace missing teeth for people of all ages. Nearly everyone is a candidate for dental implants and there are very few medical conditions that would rule out dental implant treatment. A Prosthodontist has extensive additional training in the restoration of dental implants. As part of your treatment evaluation, your dental team will carefully review all your medical history and examine the condition of your teeth, gums and bite, as well as the amount and quality of your jaw bone. Specific x-rays and models will help your Prosthodontist determine whether you are a dental implant candidate and what treatment would be required to achieve long-term predictable results.
