Dr. Marshall Fagin
Prosthodontist

Q: What are alternative esthetic restorative options for patients with limited budgets?

A: From whitening procedures to direct bonded tooth colored composite restorations for fixing chipped, rotated, discolored, decayed or replacing missing teeth, there are many choices far less costly than Porcelain veneers, crowns or conventional fixed bridges. Esthetic outcomes can vary with direct composite materials. In the front of the mouth, where optimum esthetics is often desired, especially when the patient has a high smile, I enjoy the artistry of layering colors of composite tooth colored filling materials combined with special custom color modifiers. This allows me to add opacities, craze lines and other features to more precision match the patients own teeth. This is often less than half the cost of porcelain veneers or crowns and is usually less invasive, but smoking and drinking coffee and tea or red wines, can cause staining of these non-porcelain materials sooner over time. Good daily home care is vital to long term dental health. **Call today for your comprehensive exam.**

- Tooth Whitening
- Cosmetic Veneers & Crowns
- Complete Dental Rehabilitation
 - Crowns & Bridges
 - Implant Crowns & Bridges
 - Implant Supported Dentures
